Development of Metal-free catalysts for the synthesis of cyclic carbonates from CO₂

Yasser Ali J Alassmy

This work described in this thesis was conducted at the Department of Chemical Engineering, Engineering and Technology Groningen, University of Groningen, The Netherlands.

This research is financially supported by King Abdulaziz City for Science and Technology (KACST)

Cover design: Nina - ninalindhout@gmail.com

Development of Metal-Free Catalysts for the Synthesis of Cyclic Carbonates from CO₂

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 27 November 2020 at 9.00 hours

by

Yasser Ali J Alassmy

born on 5 June 1985
in Riyadh, Saudi Arabia

Supervisors

Prof. P.P. Pescarmona
Prof. F. Picchioni

Assessment Committee

Prof. H.J. Heeres
Prof. C. Aprile
Prof. J. Yue

Dedicated to my beloved family
Asma, Battal

Table of contents

Chapter 1

An introduction to the synthesis of cyclic carbonates and polycarbonates from CO₂ and epoxides

Chapter 2

The role of Water Revisited and Enhanced: A Sustainable Catalytic System for the Conversion of CO₂ into Cyclic Carbonates under Mild Conditions.

Chapter 3

Efficient and easily reusable metal-free heterogeneous catalyst beads for the conversion of CO₂ into cyclic carbonates in the presence of water as hydrogen bond donor

Chapter 4

One-pot fixation of CO₂ into glycerol carbonate using ion-exchanged Amberlite resin beads as efficient metal-free heterogeneous catalysts

Chapter 5

Novel, green non-ionic surfactants synthesised through the reaction of CO₂ with long alkyl chain epoxides

.

Chapter 6
